

Lamberti with EcoVadis to improve its supplier sustainability assessment process

Milano, 11 December 2023

[Lamberti](#), a company that designs and produces customized chemical solutions for different industrial sectors, presents the collaboration with [EcoVadis](#) to improve the suppliers' involvement in assessing their environmental responsibility.

Founded in 1911 in Albizzate, in the province of Varese, Lamberti sustainably does business and is engaged in practices of social, environmental, and economic responsibility for the continuous improvement of environmental protection and the health and safety of all its stakeholders.

To achieve this ambitious goal, Lamberti works on two parallel levels: the Company evaluation and the supplier fleet measurement.

The collaboration with EcoVadis for business evaluation began in 2017 and has continued to this day, with **the award of the gold medal in 2023**. Achieving this level of performance and recognition has been a significant milestone for Lamberti's sustainability journey, and it has validated the company's commitment to integrating sustainability and CSR practices into its activities, in day-to-day operations and management systems.

The result obtained thanks to Lamberti's commitment to the issues of environment, work and human rights, ethics, and sustainable purchasing has prompted the company to act also in the context of supplier evaluation, developing questionnaires to submit to the supplier pool.

The process started two years ago and has allowed us to assess the compliance of the leading suppliers with the code of conduct concerning the amount of the purchase expense.

The decision to rely on EcoVadis for the next phase of this analysis arose from the need to use a more advanced evaluation system that could provide accurate scorecards and benchmarks and globally recognized supplier performance improvement tools.

The next step will be supplier onboarding in the EcoVadis platform, with a first assessment expected in the first quarter of 2024. In this way, Lamberti will be able to take advantage of the improvement actions and the actions to be taken on the supply chain suggested by EcoVadis, leading the supply chain to adopt sustainable codes of conduct and purchasing.

"We are excited to start this journey with EcoVadis because we believe in supply chain sustainability as a driver of change to help us create a new idea of reliable, safe, and responsible value," said Gianmarco Guacci, Corporate Supply Chain Director of Lamberti.

"We are happy to collaborate with Lamberti, and I am sure that together we will be able to drive the impact on a large scale, promoting the improvement of the sustainability performance of their value chain," said Giulia Borsa, Regional Team Leader, EcoVadis.

About EcoVadis

EcoVadis is a purpose-driven company whose mission is to provide the world's most trusted business sustainability ratings. Businesses of all sizes rely on EcoVadis' expert intelligence and evidence-based ratings to monitor and improve the sustainability performance of their business and trading partners.
