Decosphæra®

Polymeric Matting agent: a full range of haptic and matt solutions for outstanding performance

MAIN PROPERTIES

- ▶ Aliphatic Polyurethane
- ▶ Transparent & colored
- ▶ Bio Based & Synthetic
- ▶ Dry and wet cake
- ▶ Elastic and Durable
- ▶ Narrow Particle size distribution

APPLICATIONS

- ▶ Water borne Coating
- ▶ Solvent borne Coating
- ▶ 100% UV coatings

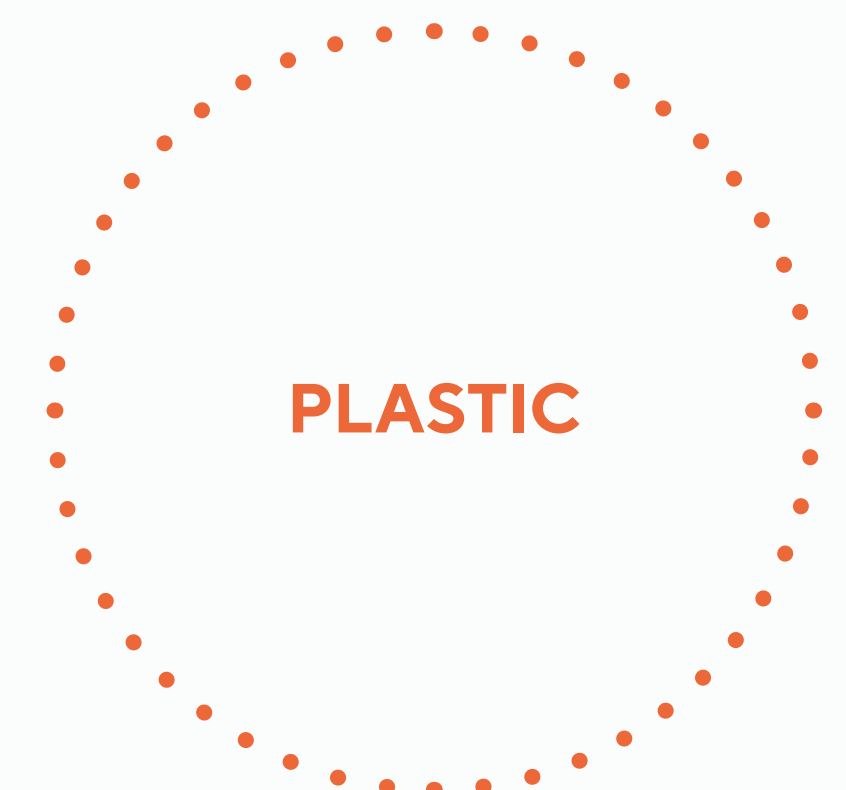

Applications

*Haptic and matt solution
for all kind of substrates*

Decosphæra® is the best option
to formulate ultra matt coatings that
combine very high performance

with sustainability and create
multidimensional coatings
for unique luxury and durable effect.

Decosphæra®

Matt & Haptic solution at glance

TRANSPARENT GRADES

- ▶ Scratch Resistance
- ▶ Matt Effect @ 60° & 85°
- ▶ From 3 µm to 30 µm
- ▶ In can stability
- ▶ Anti Burnishing

EFFECT PIGMENT

- ▶ Multicolor
- ▶ Soft touch
- ▶ Textured

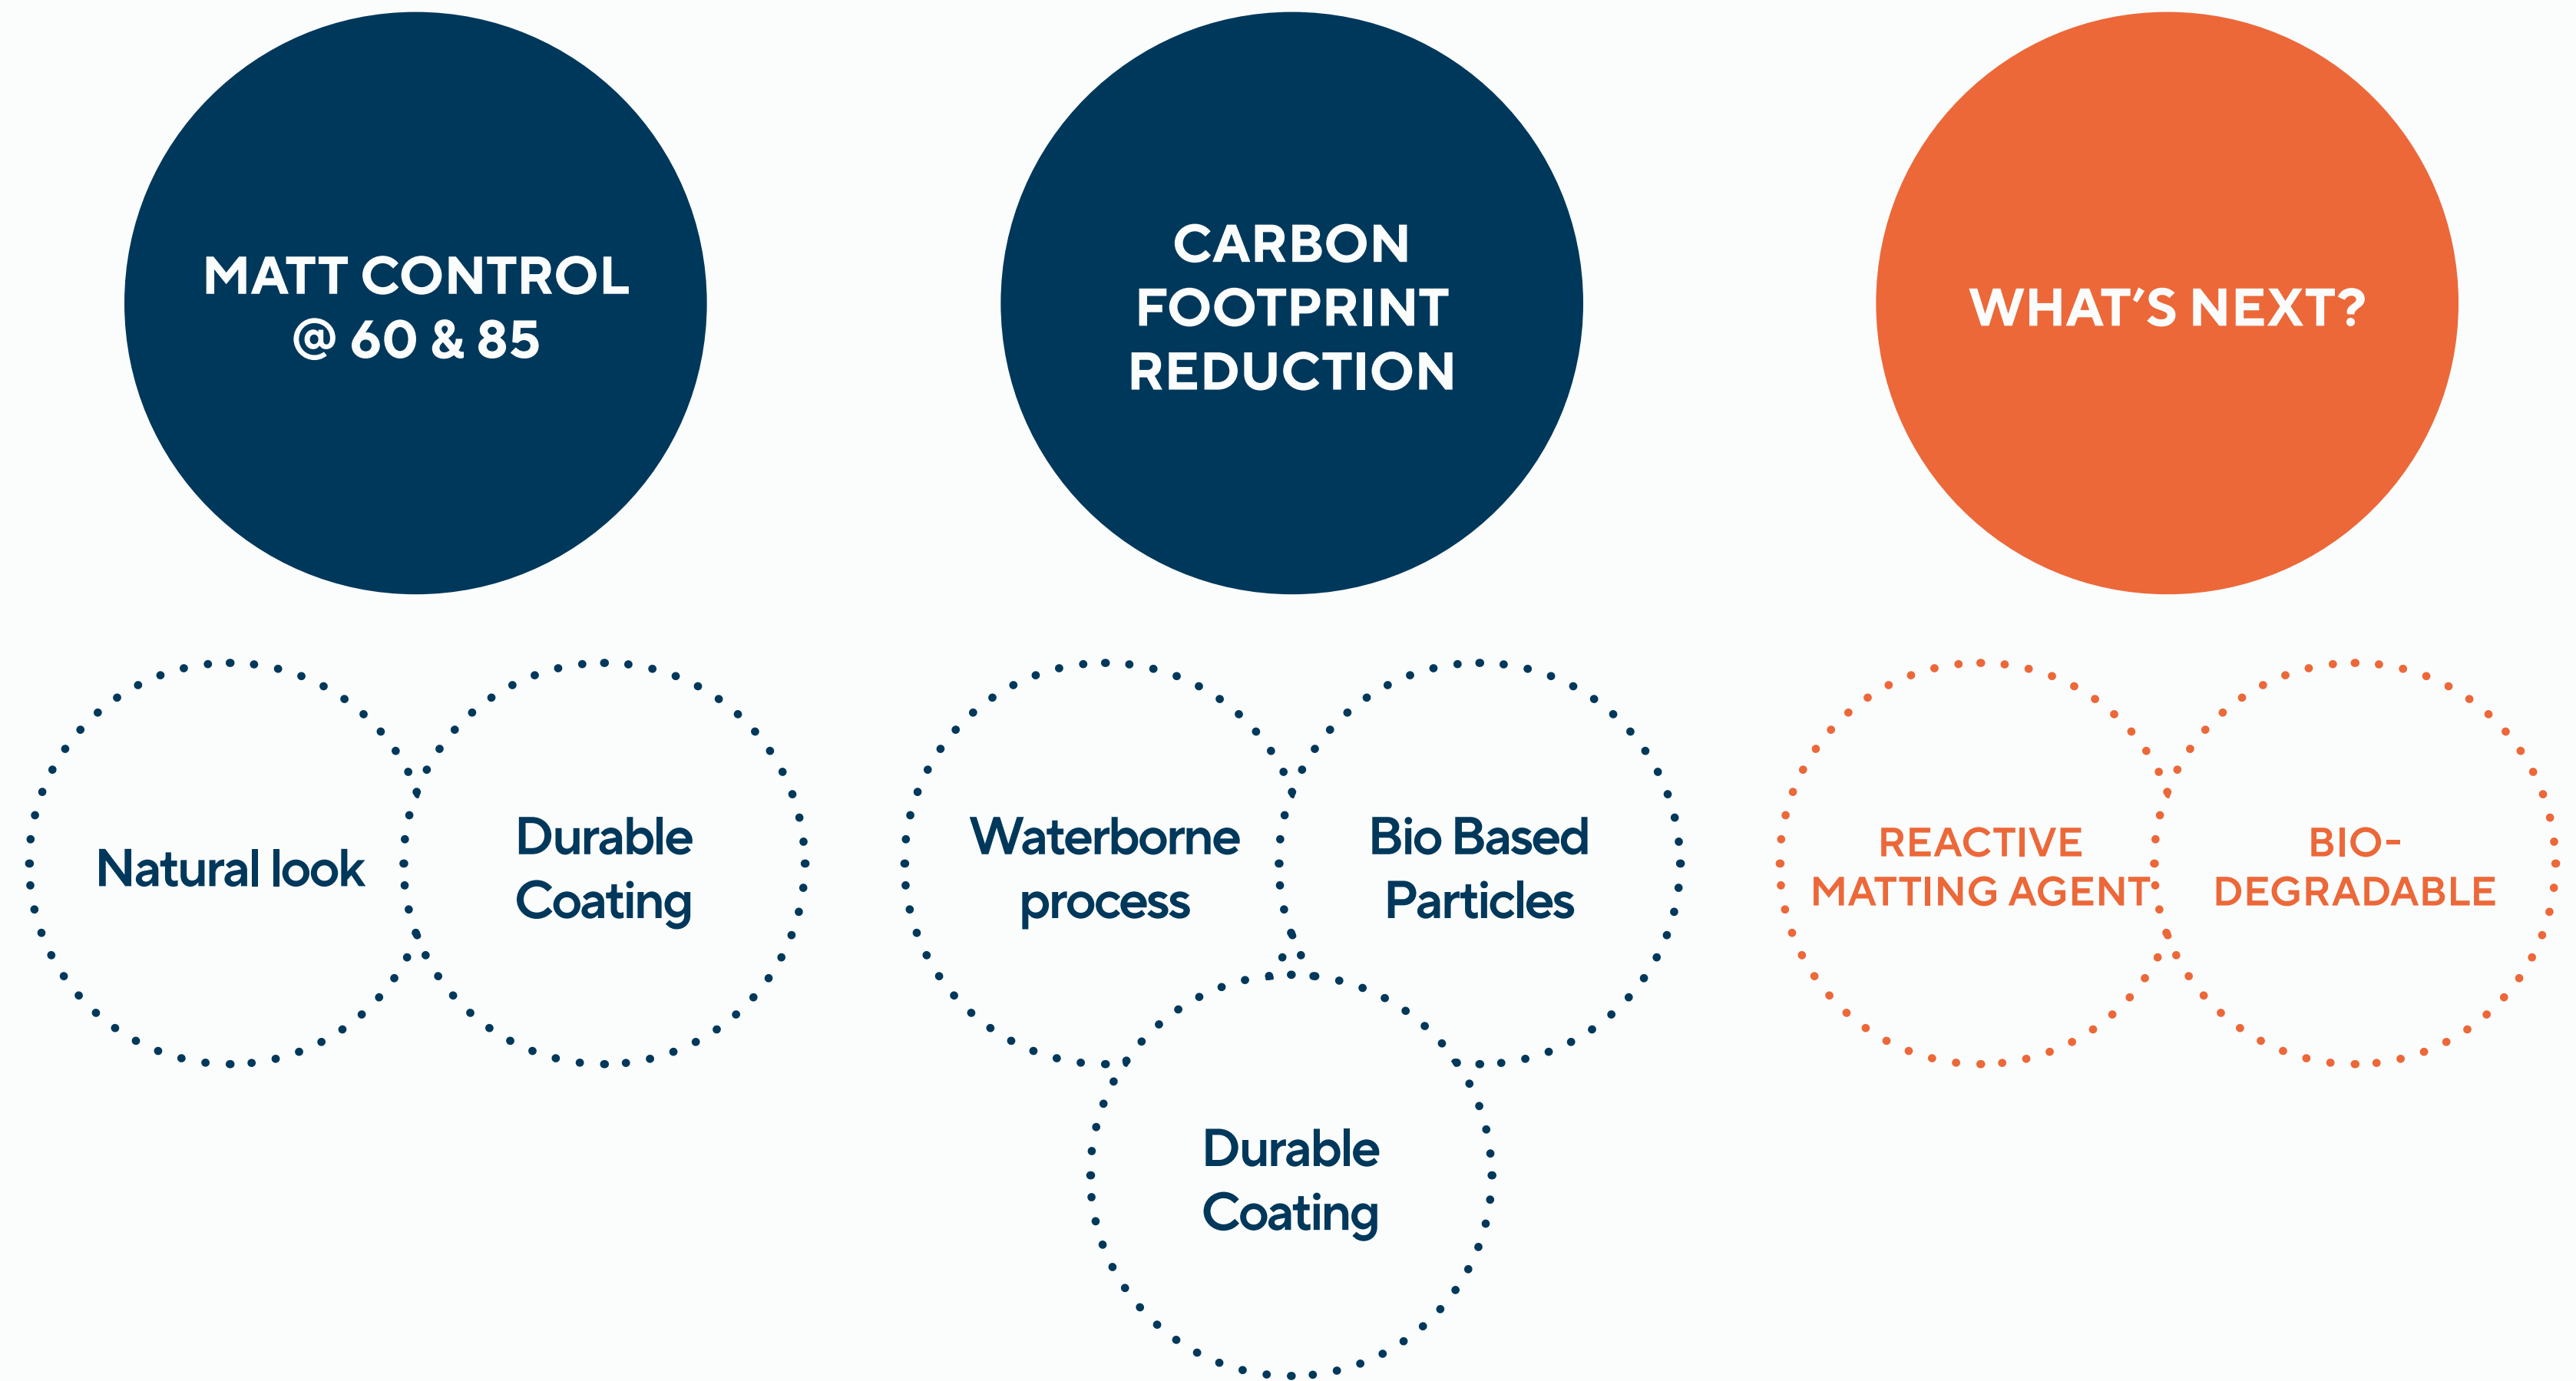

BIO

- ▶ 8 µm Transparent
- ▶ >50% Renewable source

Market Trends

We are committed to a continuous search for solutions that are based on renewable raw materials: Decosphaera® is available also with high content of renewable source to deliver high performance and ensure a respect for the environment which was achieved from utilising of a high level of renewable materials.
